## Version history

Version	Author	Information	date
1.1	PDI	No changes in content, only stylistic changes	14.02.2025
1.0	PDI		12.12.2024

## 1. Brief summary

With the start of the e-invoicing obligation for domestic B2B sales (German invoice issuers to German companies of the Storck Group), in particular with the obligation to receive e-invoices starting on 1 January 2025, the Storck Group must be able to issue e-invoices in the following formats

- ZUGFeRD<sup>1</sup>
- XInvoice

to receive and process data. This is already the case today. Invoices from business partners can - unchanged - be sent to the central mailbox [invoice@storck.com](mailto:invoice@storck.com) via the "Email" inbox.

## 2. General information

### 2.1. Legal information

The information provided does not constitute legal advice and is not intended to address any legal issues or problems that may arise in individual cases. This information is of a general nature and is provided for information purposes only.

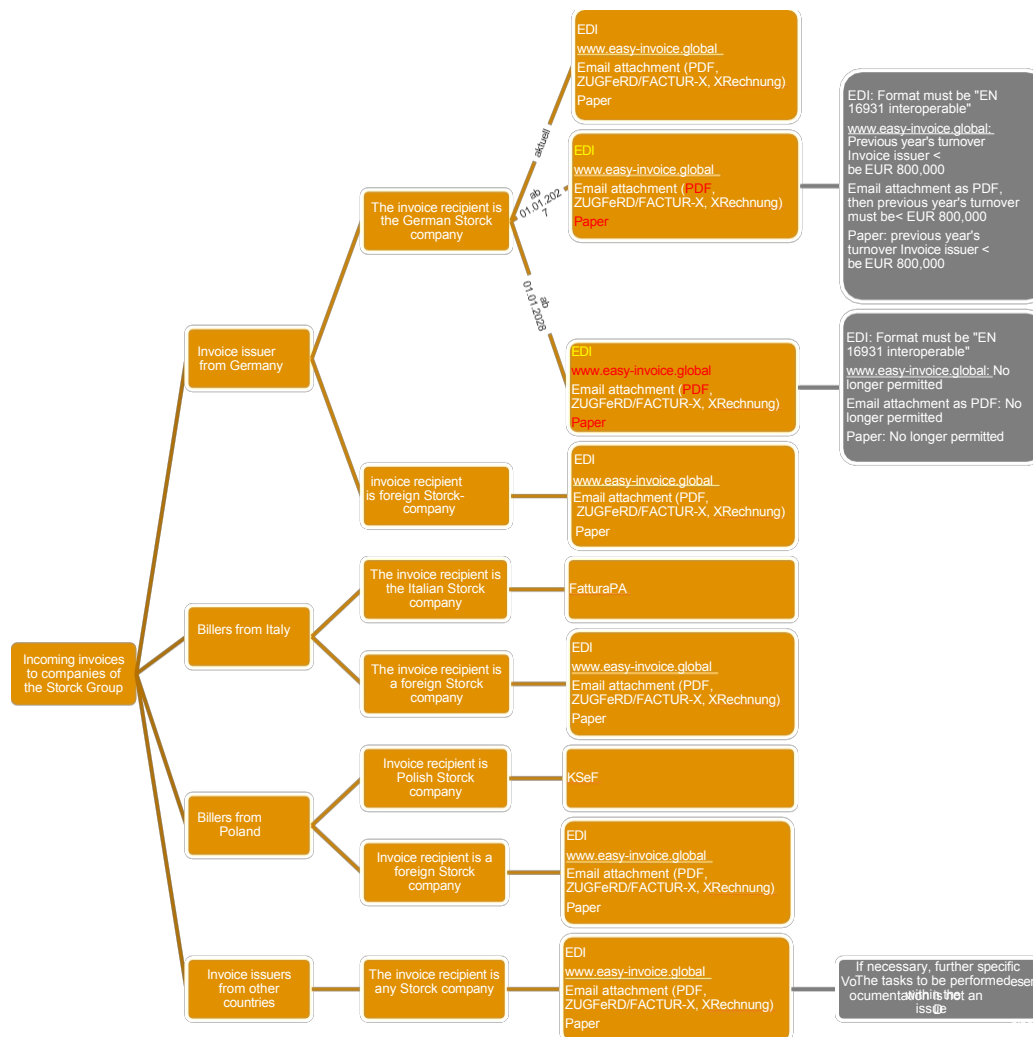

The following applies to the listed links to external websites: In its judgement of 12 May 1998 - 312 O 85/98 - "Liability for links", the Hamburg Regional Court (LG) ruled that the inclusion of a link may co-responsibility for the content of the linked page. According to the LG, this can only be prevented by expressly distancing oneself from these contents. We hereby expressly distance ourselves from the linked pages. The indication of certain links to organisations, service providers and/or software manufacturers does not constitute an evaluation or recommendation of the tools used there. For some tools a - free - registration is required, depending on the scope used, these tools may be subject to a fee.

### 2.2. Overview

The presentation of invoice transmission from business partners to Storck Group companies can be categorised as follows:

---

<sup>1</sup>The terms "ZUGFeRD" and "FACTUR-X" are used interchangeably in this document. Further information on the use of versions and profiles is provided later in the document.

This documentation focuses in particular on the alternatives of invoice transmission for domestic B2B sales (invoice issuer based in Germany to a German company of the Storck Group) mentioned at the top of the presentation.

## 2.3. Addressees

### Who is this document aimed at?

All business partners who

- have previously sent their invoices to Storck Group companies on paper or by email
- have already sent invoices in ZUGFeRD or XRechnung format via email, as details and exact specifications are explained here
- have so far used the invoicing portal [www.easy-invoice.global](http://www.easy-invoice.global) to familiarise themselves with the upcoming framework conditions. The continuation of the portal beyond 2027 is the subject of current reviews and activities in the Storck Group

## Who is this document **not** intended for?

All business partners who

- transmit their invoices to Storck Group companies via EDI (Electronic Data Exchange). The framework conditions and exact specifications (keyword "EN 16931 interoperable") for this are the subject of current tests and activities in the Storck Group

## 2.4. Background

With the Growth Opportunities Act (Federal Law Gazette I 2024 No. 108), the regulations for issuing invoices in accordance with Section 14 UStG for transactions carried out after 31 December 2024 revised. The key point of the new regulation is the mandatory use of an electronic invoice for transactions between domestic businesses (domestic B2B transactions). Exceptions to this are defined for explicit circumstances. Please refer to the following BMF letter for details and background information, in particular on deadlines/obligation to issue invoices etc:

[Issuing invoices in accordance with](#)

[§ Section 14 UStG; introduction of mandatory electronic invoicing for transactions between domestic businesses from 1 January 2025](#)

## 2.5. Permitted formats

According to the above-mentioned letter, the term electronic invoice will be redefined from 1 January 2025 by Section 14 (1) UStG. An electronic invoice (hereinafter: e-invoice) only exists if the invoice is issued, transmitted and received in a structured electronic format and enables electronic processing (Section 14 (1) sentence 3 UStG). The structured electronic format of an electronic invoice

- must either comply with the European standard for electronic invoicing and the list of corresponding syntaxes in accordance with Directive 2014/55/EU of the European Parliament and of the Council of 16 April 2014 on electronic invoicing in public procurement (OJ L 133, 6 May 2014, p. 1) (Section 14 (1) sentence 6 no. 1 UStG) or
- can be agreed between the invoice issuer and the invoice recipient. The prerequisite for such an agreement is that the format used enables the correct and complete extraction of the information required under the UStG from the e-invoice into a format that complies with the EN 16931 standard or is interoperable with it (see Section 14 (1) sentence 6 no. 2 UStG).

## 2.6. Non-permissible formats

All invoices in paper form or in electronic formats that do not fulfil the requirements of Section 14 (1) sentence 6 UStG (other electronic format) are considered "other invoices", the use of which is only permitted in exceptional cases (see explanations in the above-mentioned BMF letter). This also includes all non-structured electronic files, for example JPEG or simple PDF files.

## 2.7. Effects

As a consequence of these regulations, the Storck Group - like all German companies with domestic B2B sales - must be able to receive and process invoices from business partners in the permitted format. Permissible national e-invoice formats are explicitly mentioned:

- **Invoices according to the XStandard ("XRechnung")**
- **Invoices in ZUGFeRD format from version 2.0.1 ("FACTUR-X")**

The remainder of this document is intended to provide you with guidelines on how to use these two formats with regard to uncomplicated, automated processing so that your invoices can be processed promptly and on time. Please note the following points.

## 2.8. Additional information

Reference	Info
<a href="https://europa.eu">eInvoicing (europa.eu)</a>	General overview of the European Commission on the E-bill" topic area
<a href="https://rechnungsaustausch.org/">https://rechnungsaustausch.org/</a>	General information

<a href="https://www.part.de/">A small lexicon to the words jungle of for XRechnung, Peppol and Co. (part.de)</a>	Explanation of terms
<a href="#">Issuing invoices in accordance with Section 14 UStG; introduction of mandatory electronic invoicing for transactions between domestic from 1 January 2025</a>	BMF letter on the introduction of a mandatory electronic invoice for transactions between domestic traders from 1 January 2025
<a href="#">Federal Ministry of Finance - Questions and answers on the introduction of mandatory on 1 January 2025</a>	FAQs on the most frequently asked questions about e-billing

## 3. Organisational boundary condition

The previous organisational boundary conditions apply:

- Specification of a Storck order number, contract number or contract number plus contract item number (alone, without preceding purchasing group). Example: 0022275136, 22275136, 0003302427, 3302427, 3302427#1, 3302427#00025

- Only reference to exactly one order per invoice (no "collective invoices") at the header level of the invoice document
- Specification of a cost centre at the header level of the invoice document if it is a procurement transaction without a purchase order reference

## 4. Transmission

The transmission of the mandatory e-bill is generally open to all technologies and there is no prescribed transmission channel. The "email" transmission channel described below for the addressees of this document must fulfil the following basic requirements:

- Please send your invoice<sup>2</sup> exclusively [invoice@storck.com](mailto:invoice@storck.com)
- **Only one** attachment per email can be
  - o XML file in XRechnung format or
  - o ZUGFeRD PDF file (hybrid file consisting of carrier PDF with embedded XML file). The following therefore applies: An email corresponds to an invoice and has exactly one attachment<sup>3</sup>
- Invoice attachments (activity/delivery records, certificates, etc.) in the form of PDF files should be sent as
  - o Embedded attachment (keywords "UBL EmbeddedDocumentBinaryObjects" or "CII AttachmentBinaryObject") in the XML file of the XRechnung
  - o Additional attachments within the ZUGFeRD PDF file

be made available. Please send invoice attachments as additional attachments in the email itself only in compellingly justified cases!
- If the XRechnung is used, we do not require a visualisation as an additional attachment to the email. If you would like to provide us with a visualisation, please do so as an embedded attachment (see keywords "UBL EmbeddedDocumentBinaryObjects" or "CII AttachmentBinaryObject" above) in the XML file itself (see also footnote 3).
- Attachments with other image and/or Office file formats (JPG, DOCX, XLSX, ...) are ignored and not further processed
- The total size of the email including attachment must not exceed 20 MB
- The email must be unencrypted and should not be digitally signed
- Texts in the email ("Subject", "Body") are not processed, all relevant information must be included in the transmitted attachment

Please do not send us a document more than once without being asked!

---

<sup>2</sup> Insofar as reference is made to invoices in this document, this shall apply equally to credit notes

<sup>3</sup> Exception: Bilateral agreement of the business partner with Storck regarding the dispatch of a non-hybrid form by means of a pair of files with the same name (one PDF and one XML file, necessarily with the same name except for the file extension).

## 5. Formats

### 5.1. Semantic data model

The semantic data model is specified in EN 16931-1 "Electronic invoicing - Part 1: Semantic data model of the core elements of an electronic invoice". The semantic data model is not XML and must therefore be mapped into a syntax. These syntaxes are then the actual XMLs (see the following sections **5.2.3 Syntax CII**, **5.3.3 Syntax CII** and **5.3.4 Syntax UBL**).

An information element is an object or fact about which information - in the invoice - is transmitted. In EN 16931, the "business term" (or "BT" for short) is for the term information element. An information element can in turn consist of further information elements. An information element that consists of several information elements is itself referred to as a group of information elements ("group" for short). The term "business group" (or "BG" for short) is used in EN 16931. Business rules are rules for restricting the use of one or more information elements in the semantic data model. In EN 16931, the term "business rule" (or "BR" for short) is used. With regard to the facts, "BTs", "BGs" and "BRs" are then numbered consecutively.

Example of interaction: BR-5 --> An invoice must contain a currency code (BT-5)!

In the following, the national e-invoice formats mentioned as explicitly permissible are explained in more detail with their syntaxes.

### 5.2. FACTUR-X (ZUGFeRD)

#### 5.2.1. General information

In response to the European Directive 2014/55/EU and the subsequent publication of the European standard EN16931, the **Forum National de la Facture Electroniques et des Marchés Publics Electroniques FNFE-MPE** (the French National Forum for Electronic Invoicing and Public Electronic Markets) on the one hand and the **Forum elektronische Rechnung Deutschland FeRD** on the other have worked together to develop a Franco-German format for electronic invoices that meets both the EU standard EN 16931 and the needs and opportunities of small and medium-sized enterprises (SMEs).

Both national forums agree that a so-called hybrid format (PDF with embedded XML structure) best fulfils the objective of the EU directive to develop an e-invoice format that enables an automated invoice processing process and at the same time is usable for many millions of SMEs, as it is both machine and human readable.

This collaboration resulted in FACTUR-X, better known in Germany as ZUGFeRD. It is the first hybrid invoice format that complies with EN16931.

#### 5.2.2. Profile to be used

In principle, there are no specifications from the Storck Group regarding the use of the profile. However, the Minimum and Basic WL profiles cannot be used because they are classified as "booking aids" and do not represent a complete invoice in accordance with §14 UStG.

### 5.2.3. Syntax CII

The XML part of the ZUGFeRD invoice always complies with the UN/CEFACT Cross Industry Invoice 16B syntax, in short "CII".

#### 5.2.3.1. General business terms and fields to be used

This is followed by an explicit list of all necessary information, in particular the mandatory information required under Section 14 of the German VAT Act (UstG), here for example in the form of the "Business Terms" ("BT-xxx") already mentioned above. Lines highlighted in white must be listed exactly once per document; lines highlighted in grey must be listed at least once, possibly more than once:

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
Invoice number	BT-1	rsm:CrossIndustryInvoice rsm:ExchangedDocument ram:ID	No. 4 ("a consecutive number with one or more series of numbers that is assigned once by the invoice issuer to identify the invoice (invoice number)")

		The sales tax category is defined according to the entries in UNTDID 5305. Example: Value added tax with standard rate= S	

For information on special phrases/expressions for which there no explicitly defined business terms, e.g. information about

- Sustainability seal for raw cocoa (e.g. "RA Mass Balance" or "RASG") or palm fat (e.g. "RSPO MB" or "CSPO MB")
- Assignment, instalment, down payment, advance payment
- Amounts already paid (e.g.: "Invoice amount already received by Mastercard")
- ...

is to be utilised:

Information	Business Term	Element
Text information that refers to the entire invoice	BT-22	rsm:CrossIndustryInvoice rsm:ExchangedDocument ram:IncludedNote ram:Content

### 5.2.3.2. Business terms and fields to be used specifically

The main BTs for Storck to control the invoice receipt process are as follows:

#### General

following information is mandatory:

Information	Business Term	Element
Global identifier of the buyer (GLN of the buyer)	BT-46-0	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction

Information	Business Term	Element
company of the Storck Group) <b>OR</b>		ram:ApplicableHeaderTradeAgreement ram:BuyerTradeParty ram:GlobalID  schemeID="0088": Global Location Number Example: 4014400000009
Buyer identifier (company code of the Storck Group company) <b>OR</b>	BT-46	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:ApplicableHeaderTradeAgreement ram:BuyerTradeParty ram:ID  Without using a scheme Ex: 0002
Sales tax identification number of the buyer (VAT ID of the Storck Group company)	BT-48	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:ApplicableHeaderTradeAgreement ram:ByerTradeParty ram:SpecifiedTaxRegistration ram:ID  schemeID="VA": Sales tax identification number, e.g.: DE136654941
IBAN of the seller	BT-91	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:ApplicableHeaderTradeSettlement ram:SpecifiedTradeSettlementPaymentMeans ram:PayeePartyCreditorFinancialAccount ram:IBANID
Global identifier of the seller <b>OR</b>	BT-29-0	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:ApplicableHeaderTradeAgreement ram:SellerTradeParty

Information	Business Term	Element
Identification of the seller (Supplier/vendor number for the Storck Group)		ram:GlobalID  schemeID="0088": Global Location Number Example: 4047639000007
	BT-29	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:ApplicableHeaderTradeAgreement ram:SellerTradeParty ram:ID  Without using a scheme Example: 1973

#### Invoices for transactions with order reference

following information is mandatory:

Information	Business Term	Element
Customer order number (order number of the Storck Group company)	BT-13	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:ApplicableHeaderTradeAgreement ram:BuyerOrderReferencedDocument ram:IssuerAssignedID

#### Invoices for transactions without order reference

following information is mandatory:

Information	Business Term	Element
Accounting reference provided by the buyer OR	BT-19	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:ApplicableHeaderTradeSettlement

Information	Business Term	Element
Account reference OR assignment		ram:ReceivableSpecifiedTradeAccountingAccount ram:ID
	BT-133	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:IncludedSupplyChainTradeLineItem ram:SpecifiedLineTradeSettlement ram:ReceivableSpecifiedTradeAccountingAccount ram:ID
Article identification of the buyer (cost centre or cost centres of the Storck Group company)	BT-156	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:IncludedSupplyChainTradeLineItem ram:SpecifiedTradeProduct ram:BuyerAssignedId

For use with the BT-19, BT-133 and 156:

- The general rule for all business partners is that a cost centre must be specified as account assignment information for transactions without a purchase order reference (BT-19)
- The invoice item-related specification of account assignments is only mandatory for business partners with whom this has been explicitly agreed in writing (e.g. fuel card statements, parcel service statements, ...) (BT-133)
- If it is not possible to use the BT-133 within the scope of these bilateral agreements, the BT-156 must be used instead
- For the content of BT-133 and BT-156, the following should be noted for the presentation of account assignment information:
  - o Cost centre: Is entered in the element, if necessary with the prefix "K". Example: 150, K150
  - o Project number: Is entered in the element with the prefix "P": Example: PP.14215.31.01<sup>5</sup>
  - o Order number: Is entered in the element with the prefix "F". Example: F1508125
  - o If several account assignment references are transferred, then according to the above sequence, separated by a ";". Example: "150;F1508125", "K150;F1508125"

#### 5.2.4. Known difficulties

A number of issues are known from the past that ensure that an invoice is not a valid invoice in ZUGFeRD format in the sense of the specification and therefore could not be processed:

- PDF file is not a PDF-A/3-compliant document
- The name of the embedded XML file was not specified according to the specification
- The XML file was not embedded with the specification of a corresponding reference to docu-level (keyword "AFRelationship")

<sup>5</sup>The first "P" is the prefix, the second "P" is part of the project number, so the expression with "double P" is not a prefix. Error!

- The existence of a specific PDF/A XMP extension schema that shows that the document is a FACTUR-X invoice and is analogous to the corresponding XMP metadata (keyword "XMP extension schema")

### 5.2.5. Additional information

## 5.3. XInvoice

### 5.3.1. General information

Since **18 April 2020**, all contracting authorities must be able to receive and electronically process electronic incoming invoices in a standard that complies with EU requirements. In Germany, the **XRechnung format** was developed for this very purpose. This is a so-called Core Invoice Usage Specification (CIUS) of the corresponding **e-invoice standard EN 16931**, which is also specified by the EU. In other words, **the XRechnung is - to date - the German version of the e-invoice for administration.**

### 5.3.2. Dealing with two syntaxes

EN 16931 describes the syntaxes that can be used to represent an electronic invoice. These are ISO/IEC 19845 Information Technology - Universal Business Language (UBL) and UN/CEFACT Cross Industry Invoice 16B (CII). The abbreviated forms "UBL" and "CII" are always used in the following. Invoice issuers can choose one of the two authorised syntaxes. Invoice recipients, on the other hand, must be able to receive both authorised syntaxes. Storck must and can therefore receive and process both syntaxes.

### 5.3.3. Syntax CII

The explanations in section **5.2.3 Syntax CII** apply

Use for invoice attachments:

Information	Business Term	Element
File attachment	BT-125	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:ApplicableHeaderTradeAgreement ram:AdditionalReferencedDocument ram:AttachmentBinaryObject  Please use only the PDF format for file attachments!

### 5.3.4. Syntax UBL

Use for invoice attachments:

Information	Business Term	Element
File attachment	BT-125	Root <sup>6</sup> cac:AdditionalDocumentReference cac:Attachment cbc:EmbeddedDocumentBinaryObject  Please use only the PDF format for file attachments!

#### 5.3.4.1. General business terms and fields to be used

This is followed by an explicit list of all necessary information, in particular that which is mandatory under Section 14 UstG, here, for example, in the form of the "Business Terms" ("BT-xxx") already mentioned above. White background

---

<sup>6</sup> "Root" can be "Invoice" or "CreditNote" and is represented as follows for reasons of readability

Lines must be listed exactly once per document, lines highlighted in grey must be listed at least once, if necessary several times:

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
Invoice number	BT-1	Root cbc:ID	No. 4 ("a consecutive number with one or more series of numbers that is assigned once by the invoice issuer to identify the invoice (invoice number)")
Invoice date	BT-2	Root cbc:IssueDate	No. 3 ("the exhibition date")
Invoice type	BT-3	Root cbc:InvoiceTypeCode  Commercial invoices and credit notes are defined according to the entries in UNTDID 1001. Example: Commercial invoice = 380	
Currency	BT-5	Root cbc:DocumentCurrencyCode  Currency in which all invoice amounts are stated (except for the total tax amount in booking currency, if applicable), see BT-117 below)  Authorized currency according to ISO 4217 Maintenance Agency "Codes for the representation of currencies and funds"	
Seller/supplying entrepreneur/invoicing party	BT-27	Root cac:AccountingSupplierParty cac:Party cac:PartyLegalEntity cbc:RegistrationName  Name	No.1 ("the full name and the full address of the supplier"). Entrepreneur")
	BT-38	Root	

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
		cac:AccountingSupplierParty cac:Party cac:PostalAddress cbc:PostalZone  Postcode	
	BT-35	Root cac:AccountingSupplierParty cac:Party cac:PostalAddress cbc:StreetName  Street incl. house number	
	BT-37	Root cac:AccountingSupplierParty cac:Party cac:PostalAddress cbc:CityName  City	
	BT-40	Root cac:AccountingSupplierParty cac:Party cac:PostalAddress cac:Country cbc:IdentificationCode  Country Authorised country according to ISO 3166 1 Maintenance Agency "Codes for the representation of names of countries and their subdivisions"	

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
Buyer/ service recipient/ invoice recipient	BT-44	Root cac:AccountingCustomerParty cac:Party cac:PartyLegalEntity cbc:RegistrationName  Name	No.1 ("the full name and full address [...] of the recipient of the service")
	BT-53	Root cac:AccountingCustomerParty cac:Party cac:PostalAddress cbc:PostalZone  Postcode	
	BT-50	Root cac:AccountingCustomerParty cac:Party cac:PostalAddress cbc:StreetName  Street incl. house number	
	BT-52	Root cac:AccountingCustomerParty cac:Party cac:PostalAddress cbc:CityName  City	
	BT-55	Root cac:AccountingCustomerParty	

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
		cac:Party cac:PostalAddress cac:Country cbc:IdentificationCode  Country Authorized country according to ISO 3166 1 Maintenance Agency "Codes for the representation of names of countries and their subdivisions"	
VAT number <b>OR</b>	BT-31	Root cac:AccountingSupplierParty cac:Party cac:PartyTaxScheme cbc:CompanyID  and "VAT" in Root cac:AccountingSupplierParty cac:Party cac:PartyTaxScheme cac:TaxScheme cbc:ID	No. 2 ("the tax number issued to the supplier by the tax office or the VAT identification number issued to him by the Federal Central Tax Office").
Tax number (only if VAT number is not available) of the seller	BT-32	Root cac:AccountingSupplierParty cac:Party cac:PartyTaxScheme cbc:CompanyID  and any expression not equal to "VAT" in Root cac:AccountingSupplierParty cac:Party	

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
		cac:PartyTaxScheme cac:TaxScheme cbc:ID	
Delivery/performance date <b>OR</b>	BT-72	Root cac:Delivery cbc:ActualDeliveryDate	No. 6 ("the time of delivery or other performance; in the cases of paragraph 5 sentence 1, the time of receipt of the remuneration or part of the remuneration, provided that the time of receipt is fixed and does not coincide with the date of issue of the invoice")
Date on which the delivery of goods or provision of services was completed	BT-74	Root cac:InvoicePeriod cbc:EndDate	
Invoice item(s)  Quantity and type	BT-126	Root cac:InvoiceLine <sup>7</sup> cbc:ID  Item number	No. 5 ("the quantity and nature [customary trade description] of the goods supplied or the extent and nature of the other services provided"). tion")
	BT-153	Root cac:InvoiceLine cac:Item cbc:Name  Designation (supplemented by optional BT-154 if necessary)	
	BT-154	Root cac:InvoiceLine cac:Item cbc:Description	

<sup>7</sup> If Root represents a credit note, then "cac:CreditNoteLine" is always used instead of "cac:InvoiceLine".  
to set

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
	BT-129	Description of the Root cac:InvoiceLine cbc:InvoicedQuantity  Invoiced quantity (indicating the "unitCode" for the unit of measurement of the invoiced quantity (BT-130))	
Invoice item(s)  Charges broken down by tax rates	BT-146	Root cac:InvoiceLine cac:Price cbc:PriceAmount  Net price per unit of the invoiced quantity	No. 7 ("the consideration for the delivery or other service broken down according to tax rates and individual tax exemptions [Section 10] as well as any reduction of the consideration agreed in advance, unless it has already taken into account in the consideration")
	BT-149	Root cac:InvoiceLine cac:Price cbc:BaseQuantity  Quantity for price basis (specifying the "unit code" for the unit of measurement of the quantity for price basis (BT-150 <sup>8</sup> ))	
	BT-152	Root cac:InvoiceLine cac:Item cac:ClassifiedTaxCategory cbc:Percent	

<sup>8</sup> If BT-149 is specified, the units of measurement for BT-130 and BT-150 must be identical!

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
		VAT rate in per cent (supplemented by the following BT-118-0 and BT-151)	
	BT-118-0	Root cac:InvoiceLine cac:Item cac:ClassifiedTaxCategory cac:TaxScheme cc:ID  Fixed value "VAT"	
	BT-151	Root cac:InvoiceLine cac:Item cac:ClassifiedTaxCategory cbc:ID  The sales tax category is defined according to the defined in UNTDID 5305. Example: VAT with standard rate= S	
	BT-131	Root cac:InvoiceLine cbc:LineExtensionAmount  Net total price of the item	
Accumulated accounting positions	BT-106	Root cac:LegalMonetaryTotal cbc:LineExtensionAmount  Sum of all invoice items	No. 8 ("the applicable tax rate and the amount of tax due on the consideration or, in the case of a tax exemption, an indication that the delivery or other service exempt from tax")
	BT-109	Root	

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
		cac:LegalMonetaryTotal cbc:TaxExclusiveAmount  Net total	
	BT-117	Root cac:TaxTotal cbc:TaxAmount  Total amount of sales tax (stating the "currencyID" for the currency of the sales tax)	
	BT-112	Root cac:LegalMonetaryTotal cbc:TaxInclusiveAmount  Gross total	
According to Tax replac- totalled invoice items	BT-117	Root cac:TaxTotal cac:TaxSubtotal cbc:TaxAmount  Amount Sales tax	No. 8 ("the applicable tax rate and the amount of tax due on the consideration or, in the case of a tax exemption, an indication that the delivery or other service exempt from tax")
	BT-120	Root cac:TaxTotal cac:TaxSubtotal cac:TaxCategory cbc:TaxExemptionReason  Reason for exemption from VAT obligation, e.g. reverse charge	

Information	Business Term	Element	Mandatory information §14 UStG paragraph 4
	BT-116	<p>Root</p> <p>cac:TaxTotal</p> <p>cac:TaxSubtotal</p> <p>cbc:TaxableAmount</p> <p>Base amount for the VAT calculation</p>	
	BT-119	<p>Root</p> <p>cac:TaxTotal</p> <p>cac:TaxSubtotal</p> <p>cac:TaxCategory</p> <p>cbc:Percent</p> <p>VAT rate in per cent (supplemented by the following BT-118-0 and BT-118)</p>	
	BT-118-0	<p>Root</p> <p>cac:TaxTotal</p> <p>cac:TaxSubtotal</p> <p>cac:TaxCategory</p> <p>cac:TaxScheme</p> <p>cbc:ID</p> <p>Fixed value "VAT"</p>	
	BT-118	<p>Root</p> <p>cac:TaxTotal</p> <p>cac:TaxSubtotal</p> <p>cac:TaxCategory</p> <p>cbc:ID</p> <p>The sales tax category is defined according to the following table. The following table defines the types of contracts in UNTDID 5305. Example: Value added tax with standard rate= S</p>	

For information on special phrases/expressions for which there no explicitly defined business terms, e.g. information about

- Sustainability seal for raw cocoa (e.g. "RA Mass Balance" or "RASG") or palm fat (e.g. "RSPO MB" or "CSPO MB")
- Assignment, instalment, down payment, advance payment
- Amounts already paid (e.g.: "Invoice amount already received by Mastercard")
- ...

is to be utilised:

Information	Business Term	Element
Text information that refers to the entire invoice	BT-22	Root cbc:Note

#### 5.3.4.2. Business terms and fields to be used specifically

The main BTs for Storck to control the invoice receipt process are as follows:

##### General

following information is mandatory:

Information	Business Term	Element
Global identifier of the buyer (GLN of the Storck Group company) <b>OR</b>	BT-46	Root cac:AccountingCustomerParty cac:Party cac:PartyIdentification cbc:ID  schemeID="0088": Global Location Number Example: 4014400000009
Buyer identifier (company code of the Storck Group company) <b>OR</b>	BT-46	Root cac:AccountingCustomerParty cac:Party cac:PartyIdentification

Information	Business Term	Element
		cbc:ID  Without using a scheme Example: 0002
Sales tax identification number of the buyer (VAT ID of the Storck Group company)	BT-48	Root cac:AccountingCustomerParty cac:Party cac:PartyTaxScheme cbc:CompanyID  and "VAT" in  Root cac:AccountingCustomerParty cac:Party cac:PartyTaxScheme cac:TaxScheme cbc:ID  Example: DE136654941
IBAN of the seller	BT-91	Root cac:PaymentMeans cac:PayeeFinancialAccount cbc:ID
Global identifier of the seller <b>OR</b>	BT-29	Root cac:AccountingSupplierParty cac:Party cac:PartyIdentification cbc:ID  schemeID="0088": Global Location Number Example: 4047639000007
Identification of the seller	BT-29	Root

Information	Business Term	Element
(Supplier/creditor number under which the seller is registered with the Storck Group)		cac:AccountingSupplierParty cac:Party cac:PartyIdentification cbc:ID  Without using a scheme Example: 1973

### Invoices for transactions with order reference

following information is mandatory:

Information	Business Term	Element
Customer order number (order number of the Storck Group company)	BT-13	Root cac:OrderReference cbc:ID

### Invoices for transactions without order reference

following information is mandatory:

Information	Business Term	Element
Accounting reference provided by the buyer <b>OR</b>	BT-19	Root cbc:AccountingCost
Account assignment reference <b>OR</b>	BT-133	Root cac:InvoiceLine cbc:AccountingCost
Article identification of the buyer	BT-156	Root cac:InvoiceLine cac:Item

Information	Business Term	Element
(cost centre or cost centres of the Storck Group company)		cac:BuyersItemIdentification cbc:ID

For use with the BT-19, BT-133 and 156:

- The general rule for all business partners is that a cost centre must be specified as account assignment information for transactions without a purchase order reference (BT-19)
- The invoice item-related specification of account assignments is only mandatory for business partners with whom this has been explicitly agreed in writing (e.g. fuel card statements, parcel service statements, ...) (BT-133)
- If it is not possible to use the BT-133 within the scope of these bilateral agreements, the BT-156 must be used instead
- For the content of BT-133 and BT-156, the following should be noted for the presentation of account assignment information:
  - o Cost centre: Is entered in the element, if necessary with the prefix "K". Example: 150, K150
  - o Project number: Is entered in the element with the prefix "P": Example: PP.14215.31.01<sup>9</sup>
  - o Order number: Is entered in the element with the prefix "F". Example: F1508125
  - o If several account assignment references are transferred, then according to the above sequence, separated by a ";". Example: "150;F1508125", "K150;F1508125"

## 6. Route ID

### 6.1. General information

The routing ID is a unique character string. It is used to identify the invoice recipient when transmitting electronic invoices and to address invoices to them. It must be transmitted as mandatory information on every electronic invoice to contracting authorities (B2G).

Invoice issuers receive the routing ID from their client. In the B2B environment, the routing ID is **not** mandatory! Nevertheless, certain ERP/invoicing systems of invoice issuers require precisely this information to create an e-invoice, so the obligation to provide this information is justified from the opposite perspective, namely from the invoice issuer's point of view. Regarding the creation and validity of a routing ID, see

**C.5 Additional information.**

### 6.2. Storck routing ID

Due to the above-mentioned circumstance and the associated possibility of optimising internal processes during processing within the Storck Group, it is **recommended** to specify a "Storck routing ID"!

The Storck routing ID consists of the following components

- Coarse addressing: Constant value "11" (registered office of AUGUST STORCK KG: Berlin<sup>10</sup>)
  - o Detailed addressing: Company code of the invoice recipient (Storck Group company)
- Check digit: Automatic number resulting from coarse and fine addressing

The valid routing IDs can be found in the list in the appendix (see **8.1 Information on identifying the Information on identifying the** ).

---

<sup>10</sup> For the purposes of gross bonding, irrespective of the actual registered office of the Storck Group company, the Value "11" used

### 6.3. Syntax CII

The routing ID must be stored in the e-bill as follows:

Information	Business Term	Element
An identifier assigned by the invoice recipient and used for internal control purposes	BT-10	rsm:CrossIndustryInvoice rsm:SupplyChainTradeTransaction ram:ApplicableHeaderTradeAgreement ram:BuyerReference

### 6.4. Syntax UBL

The routing ID must be stored in the e-bill as follows:

Information	Business Term	Element
An identifier assigned by the invoice recipient and used for internal control purposes	BT-10	Root cbc:BuyerReference

### 6.5. Additional information

Reference	Info
<a href="#">Route ID - Wikipedia</a>	General information
<a href="#">FAQ on the topic of routing ID (e-rechnung-bund.de)</a>	Helpful questions and answers

## 7. Contact us

If the specifications, information and validation options in this document are not sufficient, please send your enquiry to [.invoice-support@storck.com](mailto:.invoice-support@storck.com)

Please :

- We cannot provide any advice on the subject of "e-billing". The information provided in this document which links should offer sufficient opportunity to deal with the topic
- We have no capacity for individual enquiries of the type "Can you check in advance whether you can read/process the invoice?" and are generally unable to fulfil these requests. If an invoice displayed as "valid" with the validators listed in this document, the invoice can also be processed by our software. So if you are unsure, please use these validators in advance
- For technical implementation, please contact your IT department, your system house or the manufacturer of your ERP/billing solution

## 8. Attachments

### 8.1. Identification details of the buyer

The companies of the Storck Group have the following routing IDs, GLNs, VAT IDs and company codes as invoice recipients:

The company	Route ID BT-10	GLN BT-46(-0)	VAT ID BT-48	Company code BT-46
AUGUST STORCK KG	11-0002-86	4014400000009	DE136654941	0002
Storck Service GmbH	11-0005-77	4014400000009	DE811117714	0005
Storck Schokoladen KG	11-0010-62		DE277150747	0010
Condetta GmbH C Co KG	11-0020-32	4010358000009	DE811588787	0020
WIHA Australia GmbH	11-0039-72	4068517000018	DE366366641	0039
Storck Germany KG	11-0077-55	4050996000009	DE269726552	0077
Storck Retail GmbH C Co KG	11-0078-52	4059425000009	DE306641228	0078
Storck Retail Verwaltungs- und Einzelhandels-GmbH	11-0079-49		DE352375276	0079

The company	Route ID BT-10	GLN BT-46(-0)	VAT ID BT-48	Company code BT-46
